Mike Hovedskov

Software Developer with a flair for UI/UX

I'm a passionate web application designer and developer with a focus on UI/UX Design. I specialize in creating visually stunning front-end web applications, all with my unique perspective on UI/UX Design. I have expertise in mock-ups, photo editing, image cropping, photo manipulation, and other graphic design services. I have an AP Degree in Computer Science with a top grade and have gained a lot of knowledge in the vast field. I have been around computers my whole life and always had a curiosity for technical work. My love for programming and clean, elegant design has helped me become a professional and interactive website developer. I'm always looking to further my knowledge and utilize the latest and greatest tools available.

Experience

○ Apr 2023 - July 2023

2do IT - Esbjerg ApS | H E Bluhmesvej 1, 6700 Esbjerg

Webdeveloper

I have learned a great deal about ERP systems and ecommerce CMS systems such as nopCommerce during my time at 2doit. My role involves taking some of the workload from the existing project manager by facilitating communication between the Danish customers and the development team in the Philippines.

○ Nov 2021 - Nov 2022

com

Dansk Scanning A/S | Skagerrakvej 16, 6715 Esbjerg N

Student Helper / Developer

I worked at Dansk Scanning for around a year, where I mainly focused on the Weblager application. During the project, I was tasked with redesigning and implementing the design through CSS, and also implementing the new features into the already existing codebase. I was working with a team of other students, and pretty much got free rein to bring Weblager into the 21st century not only designwise but also with new functionality with user experience in focus.

○ Aug 2021 - Jan 2023

EASV | Spangsbjerg Kirkevej 103, 6700 Esbjerg

Tutor

Tutoring newcomers to the computer science degree was an enriching experience for me. As I helped guide these students into a subject area often considered daunting, I felt it was important to make sure they grasped the material quickly and efficiently. It was empowering to watch as their knowledge developed, and as enthusiasm for the materials of the course increased. Additionally, I had an opportunity to build relationships with both my students and their peers. It quickly became evident that there was a demand for support among these learners; by providing mentorship, I could help ensure their success in this important course of study. In all, tutoring newcomers to the computer science degree gave me tremendous satisfaction and insight into how to approach my own learning of new and challenging subjects.
